PROFILE

Information Technology undergraduate at HCMUS with backend internship experience and a delivered freelance AI application. Focused on Spring Boot, PostgreSQL, explicit workflows, transaction correctness and failure recovery.

TECHNICAL SKILLS

Core: Java 21, Spring Boot, PostgreSQL, Flyway, Testcontainers, Redis, Resilience4j, Docker.

Supporting: REST APIs, JPA, SQL, idempotency, optimistic and row-level locking, JUnit, Node.js/Express, TypeScript, React, MongoDB, Git.

EXPERIENCE

Backend Developer Intern · SSTC Technology JSC

Jun - Aug 2026

R&D and Service Center · Sole developer · Java 21, Spring Boot, PostgreSQL

- Worked directly with the company director to clarify requirements; owned data design, implementation, testing and complete source handover.
- Built a backend-owned warranty workflow spanning intake, shipping, warehouse reconciliation, inspection, consent and returns; confined Claude API to language extraction with deterministic fallback.
- Applied message idempotency, optimistic locking, atomic ticket codes and short transactions with external calls outside database locks.
- Final handover records: 29 workflow states, 57 migrations and 800+ test methods. Latest documented complete Maven verification: 805 tests passed.

Full-Stack Developer · Lunfa (Freelance)

Mar - Apr 2026

University research group · Team of 2 · React, Express, Gemini/Vertex AI, MongoDB

- Delivered a Chinese-writing tutor that highlights errors and guides learner self-correction; participated from requirements through deployment.
- Implemented structured AI responses, layered malformed-output recovery, authentication and conversation persistence.

SELECTED PROJECTS

UniHub · Workshop lifecycle platform

Apr - May 2026

Team of 2. Owned admin panel, offline QR check-in, Redis rate limiting, UI/UX and database design. Authored a K6 spike scenario targeting up to 12,000 virtual users; no measured benchmark result is claimed.

Online Auction · Transaction integrity

Nov 2025 - Jan 2026

Team of 2. Database and bidder/seller workflows; PostgreSQL row-level locking, auto-bid logic, anti-sniping and post-auction settlement.

EDUCATION

University of Science - VNU HCMC

Expected Oct 2027

B.Sc. Information Technology · GPA 3.46 / 4.0

Company source and production data excluded. Test figures describe historical handover evidence.
